

ARGENTINE RED SHRIMP OFFSHORE FIP

RATING: "A - Exceptional Progress"

DATE: JANUARY 2019

Stage 4 most relevant progress during the last 12 months:

On May 17th, the Federal Fisheries Council issued the Resolution No. 7/2018, which establishes the management measures for the red shrimp fishery.

On May 19th began the prospection of argentine red shrimp in national waters, according to the provisions of Federal Fisheries Council (Minute N° 11/2018).

From July 14th to July 31th, the shrimp survey was carried out in the San Jorge Gulf, the Chubut coast and national waters aboard the BIP Víctor Angelescu.

On August 16th, the Federal Fisheries Council analyzed the results of the 2018 season, and concluded that although the bycatch is greater than that registered in 2017; it would be explained

by a greater presence of hake and abundance of juveniles of this species. Given this change of scenery they proposed to review the selective fishing gear, and it was decided to carry out a campaign to evaluate them.
