

# ARGENTINE RED SHRIMP OFFSHORE FIP

RATING: "A - Exceptional Progress"

DATE: JANUARY 2023

## Stage 4 most relevant progress during the last 12 months:

On May, the National General Audit Office approved the report: "Management of the Red Shrimp Fishery Policy. Audited period: from January 1<sup>st</sup>, 2017, till July 31<sup>st</sup>, 2019".

On June, Research Report N° 50/2022 was presented by INIDEP. The most important aspect of this report for the FIP is that for the first time a threshold limit is established to trigger effort reduction measures, that is, a catch control rule, which in the red shrimp Management Plan was called "Contingency Plan".

On November, the National University of Patagonia San Juan Bosco (UNPSJB) finalized the technical report of on-board observers for the 2022 season.

On December, the Dirección Nacional de Coordinación y Fiscalización Pesquera announced that 95 per-cent of ice-chilling red shrimp vessels' landings in national waters during the red shrimp season had been inspected.
